

COMMERCIAL QUOTATION

Zimbabwe Shipping Mobile Apps

Customer app + staff operations app

PREPARED FOR Zimbabwe Shipping	PREPARED BY Voyage Tech
QUOTATION NUMBER VT-ZS-2026-0716	DATE / VALIDITY 16 July 2026 / 30 days

Project overview

Voyage Tech proposes the design, development, integration, testing and release preparation of two connected mobile applications for Zimbabwe Shipping. The customer app will make booking and tracking simple, while the staff app will give administrators, finance teams and drivers the tools needed to manage daily operations from mobile devices.

COMPLETE TWO-APP IMPLEMENTATION

Fixed project investment

USD

\$1,199.99

Recommended ongoing service: \$149.99 per month after launch. This covers hosting oversight, monitoring, backups, maintenance and a monthly allowance for minor updates.

1. Customer mobile app

A simple, customer-focused application for people shipping goods between the United Kingdom and Zimbabwe.

Account and customer experience

- Secure registration, sign-in, profile management and password recovery.
- Personal dashboard with greeting, recent activity and quick actions.
- Saved sender, receiver, collection and delivery details.

Shipment booking and quotations

- Step-by-step shipment booking for collection and delivery requirements.
- Route, package, service and address capture with input validation.
- Instant standard pricing and custom quotation requests where required.
- Booking confirmation, reference number and booking history.

Tracking and communication

- Shipment tracking by reference number with a clear status timeline.
- Estimated arrival and progress updates from booking through delivery.
- Push, email or WhatsApp-ready notification integration for key status changes.
- Customer support contact options and frequently asked questions.

Payments, documents and service information

- Online payment integration readiness and payment confirmation records.
- Access to invoices, receipts and shipment summaries.
- Collection schedules, announcements and service availability notices.
- Customer feedback and service review submission.

Release package: branded app icon and splash screen, production Android build, store screenshots and listing support, plus an iOS-ready build configuration where required.

2. Staff operations app

A role-based internal application for managers, administrators, finance personnel and drivers.

Management dashboard

- At-a-glance shipment totals, active jobs, delivered shipments and revenue indicators.
- UK, Zimbabwe and combined operational filters.
- Attention alerts for pending collections, quotation requests and operational exceptions.

Shipment and customer operations

- Searchable shipment list with status, customer, tracking and route filters.
- Shipment detail view with sender, receiver, package and journey information.
- Status updates with customer-notification triggers and audit history.
- Customer directory, manual booking and customer contact actions.

Finance and administration

- Payments, invoices, receipts and finance dashboard access.
- Custom quotation review, response and status management.
- Collection schedule, delivery workflow, feedback and announcement management.
- Role-based menus for administrators, finance users and drivers.

Driver workflow

- Daily collection and delivery run lists with customer and address details.
- Tap-to-call customer action and job status confirmation.
- Mark Collected and Mark Delivered workflows with secure database updates.

3. Shared platform and delivery

Backend & data

Secure cloud database, application APIs, file storage and synchronized customer/staff records.

Security

Authenticated access, role permissions, validation, protected operational data and MFA readiness.

Quality & launch

Responsive testing, core workflow testing, deployment configuration and release handover.

4. Project investment

DELIVERABLE	PRICE (USD)
Customer mobile app - design, development and core workflows	\$450.00
Staff operations app - management, finance and driver workflows	\$500.00
Shared backend integration, roles, security and notifications	\$150.00
Testing, production builds, store assets and release support	\$99.99
TOTAL FIXED PROJECT PRICE	\$1,199.99

5. Recommended monthly service

DELIVERABLE	PRICE (USD)
Cloud hosting and backend oversight	\$55.00
Monitoring, backups and operational checks	\$30.00
Maintenance and priority bug fixes	\$35.00
Support and minor content/configuration updates	\$29.99
MONTHLY SERVICE TOTAL	\$149.99 / month

The monthly service begins after production launch. It is within the requested \$120-\$180 monthly operating range and may be reviewed if usage, storage, messaging volume or support requirements increase materially.

6. Delivery, payment and assumptions

Estimated delivery	6-8 weeks from approval, deposit and receipt of final content/access credentials.
Payment milestones	\$600.00 deposit to commence; \$360.00 at functional beta; \$239.99 before production release.
Included revisions	Two reasonable review rounds during the agreed design and beta stages.
Warranty	30-day post-launch correction period for defects in the agreed scope.
Quotation validity	30 days from 16 July 2026.

7. Exclusions and change control

Unless expressly included above, the quotation excludes Google Play or Apple developer-account charges, payment-processor fees, SMS/WhatsApp/email usage charges, paid third-party services, hardware, data migration beyond supplied formats, and major features requested after scope approval. Additional work will be estimated and approved in writing before implementation.

Acceptance

Approval of this quotation confirms the scope, fixed project price and payment schedule described above. Final implementation will also be governed by a short project agreement and agreed delivery checklist.
